

## Microsoft's Latest and Fastest Browser IE9

You may watch a short video that gives you an overview of IE9.

Click on "Fast Clean. Trusted." At this website...

<http://windows.microsoft.com/en-US/internet-explorer/products/ie-9/videos>

### IE 9 Considerations:

IE9 is not for Windows XP because of a lack of graphic features. For Vista and Windows 7 only.

IE9 installs quickly with no decisions.

Use the correct version: Win 7 32 bit, Win 7 64 bit, Vista 32 bit, Vista 64 bit.

IE9 installs right over your old version. You should upgrade to IE9.

Get it at... <http://www.beautyoftheweb.com/#/download>

The website will look at your PC and show you which version to download.

### IE9 Features:

#### *Faster:*

There is a faster response from hardware acceleration, using the power of your graphics processor unit in your computer. High-definition videos are smoother, graphics are clearer and responsive, colours are truer. There is a Microsoft website that demonstrates how IE9 works with hardware acceleration.

<http://ie.microsoft.com/testdrive/Performance/FishIETank/Default.html>

Adding fishes eventually slows IE down, but the demo illustrates that IE9 is fast.

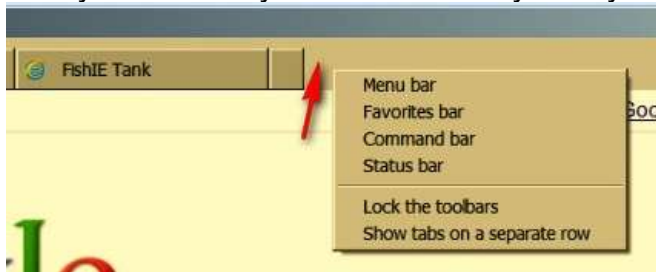

#### *New Interface:*

Saves space, Address bar and Search bar are combined.

Where the red arrow is you can type your website address or anything you wish to have Google search for you. On the same bar you have the tabs.

You can get back all your bars. Right click in the bar shown by the red arrow and then click which bars you want. If you have too many tabs you can click "Show tabs on a separate row".

This shows IE9 with all the bars displayed and the tabs on a separate bar.

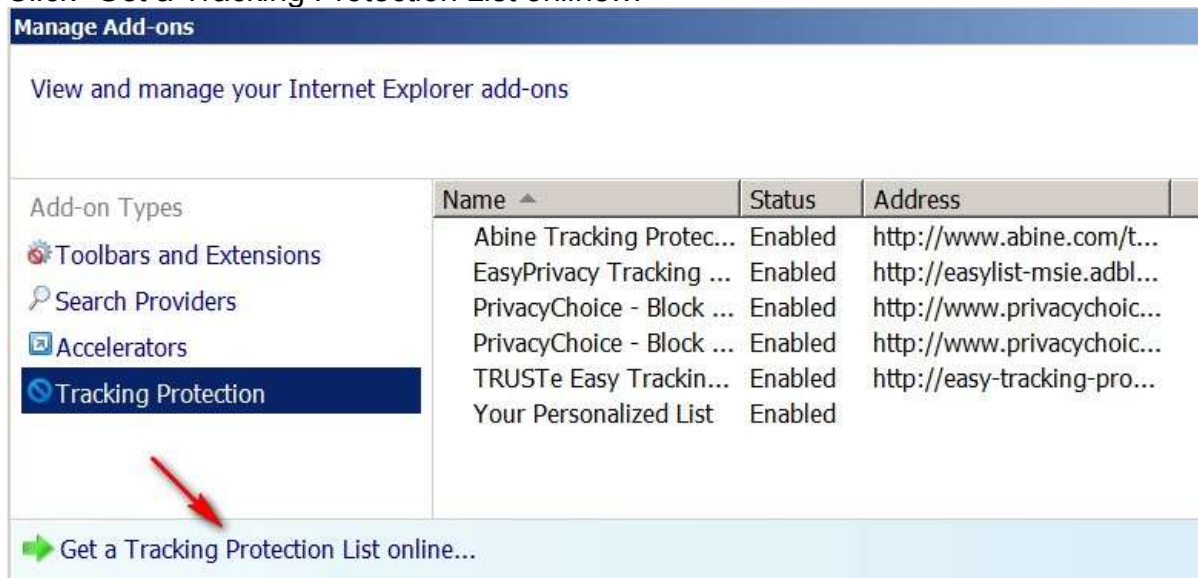

## Security – Tracking Protection

Websites may track your page displays on their website so they can arrange the website for you to see what you are interested in quicker. Third party tracking is sending this info to a website that you are not visiting. Tracking Protection Lists are like “Do Not Call” lists for third-party content on a website. You can control it in IE9. However...Some websites need cookies and tracking to operate. You may want to try Tracking Protection but if operate your websites as before remove it.

### To setup Tracking Protection.

Click “Safety” on the bar. Click “Tracking Protection”.

Click “Get a Tracking Protection List online...”

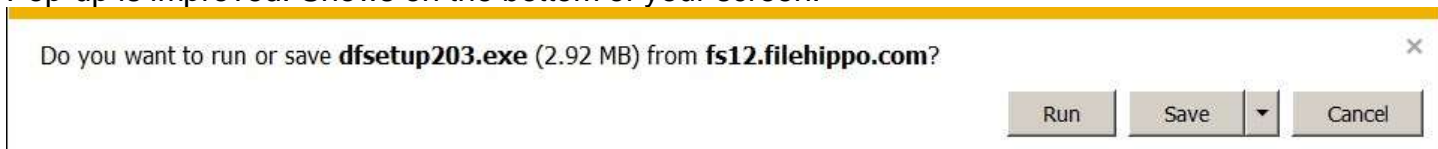

Add-on Types	Name ^	Status	Address
Toolbars and Extensions	Abine Tracking Protec...	Enabled	http://www.abine.com/t...
Search Providers	EasyPrivacy Tracking ...	Enabled	http://easylist-msie.adbl...
Accelerators	PrivacyChoice - Block ...	Enabled	http://www.privacychoic...
Tracking Protection	PrivacyChoice - Block ...	Enabled	http://www.privacychoic...
	TRUSTe Easy Trackin...	Enabled	http://easy-tracking-pro...
	Your Personalized List	Enabled	

Get a Tracking Protection List online...

Choose as many of the TPLs as you wish and then Click the X to get out of the list and click the X to get out of Manage Add-ons. The above list has all of them installed.

### Notification bar Improvement.

Pop-up is improved. Shows on the bottom of your screen.

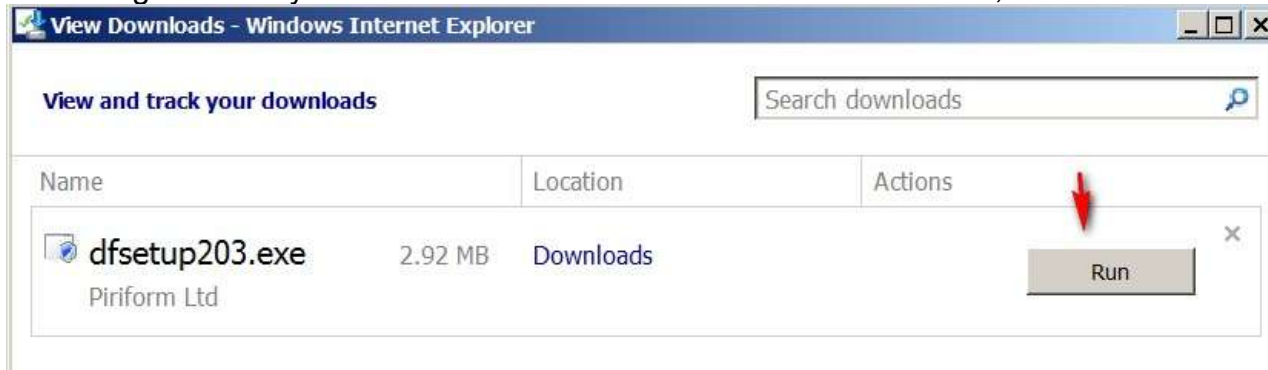

Do you want to run or save **dfsetup203.exe** (2.92 MB) from **fs12.filehippo.com**?

Run Save Cancel

You can Run, Save or Cancel and continue your work.

You can go back to your download later and install it. Click on “Tools”, “View downloads” .

Name	Location	Actions
 <b>dfsetup203.exe</b> Piriform Ltd	2.92 MB Downloads	Run

### *Pinning.*

You visit a website and want to go back often. You can pin it to the task bar at the bottom of your screen. Drag and drop File Hippo, for example, down to taskbar and release. Click and hold where the red arrow is. Drag it to the bottom of your screen and release where you want it.

Now you can click on the pinned site to get there quickly.

### *Summary.*

Internet Explorer is fast. It is a much improved browser.

You should install it if you have Vista or Windows 7.

If you have XP, ensure you have IE8 installed. IE 8 has all the security features of IE9 except the Tracking Protection.

When you up-grade IE, your favourites, homepage and most settings are moved to the new version.
